

*Proceedings of the Second International Workshop on*  
**MULTISTRATEGY LEARNING**  
**(MSL-93)**

**May 26-29, 1993**  
**Harpers Ferry**

**Edited by Ryszard S. Michalski and Gheorghe Tecuci**

**Sponsored by the Office of Naval Research and  
the Center for Artificial Intelligence, George Mason University**

# Contents

## I. General Issues

|                                                                                   |    |
|-----------------------------------------------------------------------------------|----|
| Knowledge Representation for Multistrategy Task-adaptive Learning:.....           | 3  |
| Dynamic Interlaced Hierarchies<br><i>Michael R. Hieb and Ryszard S. Michalski</i> |    |
| Better Learners Use Analogical Problem Solving Sparingly.....                     | 19 |
| <i>Kurt VanLehn and Randolph M. Jones</i>                                         |    |
| Multistrategy Learning: An Analytical Approach.....                               | 31 |
| <i>Matija Drobnic and Matjaz Gams</i>                                             |    |
| Reflection and Analogy in Memory-based Learning.....                              | 42 |
| <i>Enric Plaza and Josep Lluís Arcos</i>                                          |    |
| Learning Scope, Task Analysis, and Sharable Components.....                       | 50 |
| <i>Erik M. Altmann</i>                                                            |    |
| INTELOG: A Framework for Multistrategy Learning.....                              | 58 |
| <i>Wayne T. Jenkins</i>                                                           |    |

## II. Knowledge Base Refinement

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| Symbolic Revision of Theories with M-of-N Rules.....                                                  | 69  |
| <i>Paul T. Baffes and Raymond J. Mooney</i>                                                           |     |
| Knowledge Base Refinement Through a Supervised Validation of Plausible Reasoning.....                 | 76  |
| <i>Gheorghe Tecuci and David Duff</i>                                                                 |     |
| Learning to Survive.....                                                                              | 92  |
| <i>Luc De Raedt, Erlend Bleken, Vincent Coget, Chaouat Ghil,<br/>Bart Swennen, Maurice Bruynooghe</i> |     |
| MUSKRAT: A Multistrategy Knowledge Refinement and Acquisition Toolbox.....                            | 107 |
| <i>Nicolas Graner and Derek Sleeman</i>                                                               |     |

## III. Cooperative Integration

|                                                                                         |     |
|-----------------------------------------------------------------------------------------|-----|
| Plausible Explanations and Instance-based Learning in Mixed Symbolic/Numeric Domains... | 123 |
| <i>Gerhard Widmer</i>                                                                   |     |
| k-DT: A Multi-Tree Learning Method.....                                                 | 138 |
| <i>David Heath, Simon Kasif and Steven Salzberg</i>                                     |     |

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| Meta-Learning for Multistrategy and Parallel Learning .....                                | 150 |
| <i>Philip K. Chan and Salvatore J. Stolfo</i>                                              |     |
| Conceptual Clustering of Events Using Statistical Split Criteria.....                      | 166 |
| <i>Bradley L. Whitehall and David J. Sirag, Jr.</i>                                        |     |
| Cooperation of Data-driven and Model-based Induction Methods for Relational Learning ..... | 180 |
| <i>Edgar Sommer</i>                                                                        |     |
| Multistrategy Constructive Induction: AQ17-MCI .....                                       | 188 |
| <i>Eric Bloedorn, Janusz Wnek and Ryszard S. Michalski</i>                                 |     |

#### **IV. Multiple Computational Strategies**

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| Extracting Symbolic Rules from Artificial Neural Networks .....                  | 207 |
| <i>Mark W. Craven and Jude W. Shavlik</i>                                        |     |
| A Multistrategy Learning Scheme for Assimilating Advice in Embedded Agents ..... | 218 |
| <i>Diana F. Gordon and Devika Subramanian</i>                                    |     |
| REGAL: An Integrated System for Learning Relations Using Genetic Algorithms..... | 234 |
| <i>Attilio Giordana and Lorenza Saitta</i>                                       |     |
| Incremental Genetic Programming and Neural Net Learning: A Case Study .....      | 250 |
| <i>Hugo de Garis</i>                                                             |     |

#### **V. Special Topics and Applications**

|                                                                                    |     |
|------------------------------------------------------------------------------------|-----|
| A Multistrategy Case-based and Reinforcement Learning Approach to.....             | 259 |
| Self-improving Reactive Control Systems for Autonomous Robotic Navigation          |     |
| <i>Ashwin Ram and Juan Carlos Santamaria</i>                                       |     |
| A Machine Learning Approach to Document Understanding .....                        | 276 |
| <i>Floriana Esposito, Donato Malerba, Giovanni Semeraro and Michael J. Pazzani</i> |     |
| Towards GEST-3D: Learning Relations in 3-D Shapes .....                            | 293 |
| <i>Jakub Segen</i>                                                                 |     |
| Thinking and Seeing in Game Playing.....                                           | 301 |
| Integrating Pattern Recognition and Symbolic Learning                              |     |
| <i>Susan L. Epstein and Jack Gelfand</i>                                           |     |
| Applying Multiple Learning Strategies for Classifying Public Health Data .....     | 309 |
| <i>John W. Sheppard</i>                                                            |     |
